

This week, I work on:

1. Research the document about Trifacta, and watch the video:

<https://www.trifacta.com/products/>. This project transitions raw data source inputs into prepared data set outputs. It can return regular data and statistical chart about the data. Next week I will download the software and write a survey about this.

2. Make slides about VAUD
3. Install node.js and build a simple server.
4. Write paper about socialism with the Chinese characteristics. And review theory of computation for the exam on Thursday and Tuesday next week.
5. Translate paper about computer graphics

Next week:

Prepare the final exam.

Prepare speeches about VAUD.

Write Trifacta survey.
